

Call for Papers

Nordic Public Policy Symposium 2024

19-20 December 2024

Hosted by: CEBI, University of Copenhagen

Deadline: 1 October 2024

We invite submissions of papers or paper proposal to the second **Nordic Public Policy Symposium** (NPPS), to be held on 19-20 December 2024. This year, the NPPS is hosted by the Center for Economic Behavior and Inequality (CEBI) at the University of Copenhagen.

The keynote speaker is **Henrik Kleven, Princeton University**.

The NPPS is an annual event, rotating across the Nordic countries. The first symposium took place last year at Stockholm University. The goal of the symposium is to provide a forum for high-quality work on public policy for researchers who have a connection to the Nordic region. This means either being based in a Nordic country or working with data from the Nordic countries. The event provides an opportunity for researchers to discuss their work and develop new collaborations and relationships. It also provides an opportunity for young researchers to meet and discuss their work with senior economists.

Paper proposals are invited in any area of public policy / public economics, broadly defined. We are reserving some presentation opportunities for junior researchers who are planning to go on the job market soon. The symposium will also include a poster session for PhD students. To secure an intimate atmosphere, we limit the total number of participants to forty persons.

Funding

We are able to cover travel costs (economy-class) and accommodation for two nights in Copenhagen for all participants. To foster interactions, we ask that participants stay for the entire duration of the symposium.

How to apply

Please submit your paper / paper proposal to nordicpublicpolicy@gmail.com no later than **October 1, 2024**. When you submit, please let us know if you are a PhD student. Please also let us know if you are planning to go on the academic job market soon. We aim to notify successful applicants by the end of October.

Organizers

Claus Thustrup Kreiner, CEBI, University of Copenhagen

David Seim, Stockholm University
